The Lightest Video Gimbal Head ever made. Research, design and cutting-edge technology make it an unparalleled product both in terms of performance and quality. Attractive design, specifically designed to obtain maximum rigidity combined with ergonomics and functionality. 100% Made in Italy.

Used Technology: CNC Machining and Extruded.

Body Principal: Made in Carbon Fiber.

Product Weight: 0.90 Kg = 1.98 lb.

Max Load: 20 Kg = 44 lb.

Dimension: 222x171x85 mm = 8.7x6.7x3.3.

Operating Temperature: +68°/-32°C = 154°/90°F.

Movements: Fluid, Ball Bearings and Fluid Cartridges.

Recommend for: Birdwatching, Wildlife and Sports Photography.

Lenses Recommend: small tele, small spotting scopes, body cameras, Black Magic, other mirrorless cameras and DSLR cameras for video or other devices requiring a smooth following motion. It is also used for with big lenses.

Two fixed fluid cartridges dampen movement in the two axes of rotation and 5 support bearings facilitate smooth soft and precise movements. The Gimbal system with both vertical and longitudinal adjustments allows perfect balance and centering. ZV PLUS comes complete with Carbon Fiber Pan Bar and Arca Swiss compatible Quick Release plate. ZV is produced with the best materials on the market today: main body in Carbon Fiber to absorb the micro-vibrations of the shot, Extruded Aluminum to increase solidity and Stainless Steel screws to resist all conditions.
