The Lightest Gimbal Head ever made. Research, design and cutting-edge technology make it an unparalleled product both in terms of performance and quality. Attractive design, specifically designed to obtain maximum rigidity combined with ergonomics and functionality. 100% Made in Italy.

Used Technology: CNC Machining, Forged and Extruded

Body Principal: Made in Carbon Fiber.

Product Weight: 0.90 Kg = 1.98 lb.

Max Load: 70 Kg = 154 lb.

Dimension: 230x230x90 mm = 9x9x3.5 in.

Operating Temperature: +68°/-32°C = 154°/90°F.

Movements: Smooth Free, Ball Bearings.

Recommend for: Birdwatching, Wildlife and Sports Photography.

Lenses Recommend: All

ZX model represents the flagship model of our production. This product contains all the features necessary to satisfy the needs of lightness, practicality and safety. The Quick Release Lever and the Lens Saver Lever are the two main features that make the ZX PLUS the perfect Gimbal for every need and functionality. It is therefore a product that is easy to transport and quick to use thanks to the features listed above. To complete the features we find a leveling bubble and a Safety Pin to prevent the lens from falling out during vertical balancing. ZX is produced with the best materials on the market today: main body in Carbon Fiber to absorb the micro-vibrations of the shot, Forged Aluminum to increase solidity, Magnesium Alloy to give extreme lightness and Stainless Steel screws to resist all conditions.
